STORY OF THE PRODUCER:

"It all started during my childhood when I used to accompany my mother, Leda, to the farm and later she encouraged me to attend the college of agronomy. From there to now the interest has become a passion and I can't imagine myself working with any other thing.

The desire to stay in the profession comes from knowing that I never know everything, there is always a new knowledge to be tested, it is always dynamic. Also, the satisfaction of being able to please several people with my work, that's something priceless to me."
