

ZAMBIA ESTATES

Fully Washed, Natural & Honey Processed

TYPICAL CUP PROFILE

Body

Acidity

SCA Score

Flavour: Lemon, berries, milk chocolate, light caramel. Balanced and sweet.

Producer: NCCL Estates

Number of Estates: 3 (Ngoli, Isanya, Kateshi)

Cultivated Area: 2,200 Ha

Irrigation: Yes

Certifications: Rainforest Alliance, UTZ and 4C.

Altitude: 1300 - 1550 masl

Temperature: Avg summer: 21-22C
High: 36-38C October
Low: 3C early morn July

Rainfall: 1,100mm per annum

Primary Varietal: Catimor 129

Specialty Varietals: Java, Miracle and Marsellesa

Processing: Fully Washed, Natural and Honey

Port of Shipment: Dar Es Salaam, Tanzania

Shipment Period: September - February

Key Products

Mount Nsunzu:

FW AAA (15-20 boxes per season)

FW AA (30-35 boxes per season)

Specialty Natural (~3 boxes per season)

Mafinga Hills:

FW AB (5-10 boxes)

Specialty Honey Process (~3 boxes per season)

The Region

The Northern province of Zambia shares its borders with Tanzania to the East and D.R. Congo to the North. It also occupies the southern shore of Lake Tanganyika - the world's longest fresh-water lake, and the largest in Africa by volume. Northern province has the best conditions for arabica coffee cultivation in Zambia with its relative proximity to the equator and abundant altitude (Mafinga Hills being the highest point in the country at 2,300masl). The local economy is dominated by agriculture with coffee being a primary cash crop alongside subsistence crops such as maize, millet, groundnuts and beans. The mountainous terrain and lack of transport infrastructure makes this region challenging to work in, but also one most in need of the investment and development which the coffee industry can bring.

Social and Community

- Primary school built in local community, with 900 students in attendance (in collaboration with PEAS and Costa Foundation)
- Free access to basic healthcare and medication for residents at dispensaries
- Crèche for worker's children
- Free housing for residential workers and their families
- Training and employing Zambia's first female tractor drivers
- Out-grower program for seedlings, sustainability, quality and field support (168 farmers and growing)

Partnership Opportunities

We are always seeking to collaborate on projects related to:

- Education
- Medical and Healthcare
- Gender Equality
- Out-Grower program
- Environmental
- Community Infrastructure
